Web Designer Diploma Program

Program Objectives

This program provides students with the necessary skills and knowledge to build a web design foundation, learn industry-standard software programs, and produce a well-rounded and exciting portfolio. Students learn how to plan and design compelling and interactive websites and learn to use industry-related programs, such as Adobe Photoshop, Illustrator, Dreamweaver, and Flash, for website designs.

Students will also explore HTML and CSS for web publishing alongside essential topics, such as accessibility standards, color, typography, and composition, as well as dig into PHP and WordPress development. Web Design graduates develop a professional design process for building a website from concept to launch.

Duties and Responsibilities

Web designers source and combine the textual content, graphics, interactive elements, and navigation structures that comprise websites. Web designers use their artistic and creative vision to design the look and feel of a website and use web software and programming skills to create websites.

Duties may include:

- Presenting creative ideas
- Assessing client and end user needs
- Consulting with IT professionals to determine how best to incorporate a website into existing frameworks
- Designing the typography, layout, and look and feel of web pages
- Designing and incorporating graphics and interactive elements

Competencies and Core Courses
